

Genealogy DNA Workshop October 11, 2025 Frisco Public Library

8000 Dallas Parkway, Frisco, TX 75034

"Introduction to DNA" 2:30-3:30 PM

Sometimes learning about DNA and DNA testing can be confusing. This class will help explain all of the different terms associated with DNA. We will also discuss hereditary, genetics, and of course DNA. It may help you realize things that you knew about your family had to do with DNA all along. Handouts will also be provided with definitions on the many terms we will be discussing. The class will be held in the Library's Computer Lab with a Q & A Session starting at 3:30pm.

We will also discuss the four major DNA testing sites and the benefits of each one. These four are 23 and Me, Ancestry DNA, Family Tree DNA and My Heritage DNA. We will also discuss how to compare your results with the other sites using Gedmatch.com. A step by step guide will also be handed out.

This class is a joint venture between The Heritage Association of Frisco and the Frisco Public Library. The class will be taught by **Vickie Burns**, Heritage Association member, and Genealogy Instructor and researcher. Classes are free but registration is required so we know how many are attending. Please email **vickie.burns22@gmail.com** to register for the class.

The Frisco Public Library is located at the South East Corner of the Dallas North Tollway and Cotton Gin Road.
